

LYNX-4™ HVLP GRAVITY FEED SPRAY GUN

Converts your compressed air to HVLP. Simply connect our LYNX™-3 HVLP Guns directly to your shop's air line and you are ready to reap the benefits of a High Volume Low Pressure spray system. Operating at standard air line pressures, the LYNX™-4 HVLP Guns creates less than 10 psi of pressure at the guns while maintaining a minimum of 65% transfer efficiency. No matter what you are spraying, you are sure to save up to 50% in material consumption. The LYNX™-4 guns are the best on the market based on benefit to cost and customer feedback.

It requires only a 3 HP ordinary shop compressor* to do an excellent spray finishing job with most sprayable materials including all HYDROCOTE® finishes. Other conversion guns currently on the market require a minimum of a 5 HP compressor to deliver less than equivalent results.

LYNX™-4 HVLP Gun is as easy to use as the high pressure gun you're using now or accustomed. No complicated attachments, manifolds or large cumbersome hoses needed. Includes gun and cup gun assembly. Supplied with 1.4 mm atomizing set. Includes a 600 ml polyethylene cup with screw on cap. Larger cups and of aluminum construction are also available.

<u>LYNX-3GF</u>	Spray Gun with Cup Gun Assembly - Gravity Type (4#)	\$ 149.95
580-10058-GF	1.5 mm Atomizing Set - Gravity Feed Gun	\$ 69.00
580-10086-GF	2.2 mm Atomizing Set - Gravity Feed Gun	\$ 69.00
91641	600 ml Gravity Feed Plastic Cup w/Lid	\$ 19.95
91646	600 ml Gravity Feed Aluminum Cup w/Lid	\$ 23.95
91644	1000 ml Gravity Feed Aluminum Cup w/Lid	\$ 29.95

***A 1 HP compressor can power the gun, but for short spraying sessions only.**
