

SURFACE NEUTRALIZING & CLEANING PRODUCTS

HOODSOLV® WASH THINNER

A unique blend of solvents that in combination effectively clean wood and metal surfaces upon stripping and prep for new stain and finish. Use on fine antiques or wherever *water cannot be or should not be used for neutralizing after stripping*. Gives the wood that squeaky clean look. Will also pull most dye stains out of the wood grain. **Non-grain raising**. Gentle on the hands, though use of gloves is highly recommended.

Not suitable for thinning of lacquers or other finishes.

HOODKLEEN™ DEWAXER /SILICONE WASH

Preps an existing finish to accept an overcoat. Dewaxes, cleans and removes silicone and polishes from furniture, wood or metal without effecting or removing the existing finish. Removes grease, oil, grime, silicone, waxes and polishes which typically cause *fish-eyes* and *orange peel*. **Will not attack a lacquer finish, varnish, shellac or a polyurethane, nor most water-based finishes.** Simply wipe or brush onto the surface to be cleaned, let dwell for a few minutes then wipe clean with a clean, lint-free rag. May have to be used in conjunction with 3/0, 4/0 steel wool or a fine scrubbing pad then wiped clean with a clean, lint-free rag. No neutralization required after use.

HOODSOLV® AFTERWASH-103

Premium grade Wash Thinner providing benefits over and above to our Wash Thinner above. Reduces "*wet spots*" and "*sweating*" during refinishing. Can be used for thinning of lacquers as well, thus cost effective in reducing the need for two separate products. Often minimizes sanding as well. **Non-grain raising**.

FISH-EYES REMOVER/DEWAXER (NON-HAZARDOUS)

A MUST PRODUCT FOR ANY FURNITURE REFINISHER

This **Green Technology™** product cleans and dewaxes by emulsification rather than by solvency, thus rids off silicone contamination and waxes often much better. Since silicones from polishes that cause fish-eyes and orange peel are insoluble in any solvent, they can be removed only through emulsification by using this product in conjunction with a stiff brush, or coarse scrubbing pad. Can be added to above Wash Thinner, Afterwash-103, Dewaxer/Silicone Wash, Alcohol or a Lacquer Thinner up to 25% to enhance their cleaning performance. *Should fish-eyes appear upon application of finish or sealer, let the finish or sealer dry overnight, then wet sand with this product at full strength and wipe clean with a rag.* Neutralize after use with dampened rag of denatured alcohol or rubbing alcohol. This product is *totally non-hazardous* - makes for an excellent hand soap and an all purpose cleaner too.

PURGE-ALL™ DIRT, STAIN, SILICONE REMOVER

This phosphate free, **Green Technology™** formula cleaner is a must for any furniture refinisher to clean raw or stripped wood, or for prepping an existing finish for refinishing. Superior cleaner to TSP. Leaves the furniture squeaky clean by effectively removing grease, oily film, dirt and silicone contaminants from polishes. For optimum results, use a scrubbing brush or coarse scrubbing pad when cleaning after stripping. Removes stain and silicones while neutralizing, thus eliminating "*fish-eyes*" and "*wet spots*" upon refinishing. Removes dirt and grime like no others. Mixes with water like TSP.

Better than TSP

Directions for use are provided on the label, which must be followed to avoid refinishing problems.

RAGS - FOR CLEANING, STAINING, POLISHING, PADDING

Superb quality multi-purpose rags designed for multi-tasking as given below. For example, the Premium Ganzie rags are lint-free, recycled T-shirts that are silk-screen free. Our biggest seller in rags because these are applicable to general purpose cleaning (before and after stripping), staining, hand polishing of finishes and french padding.

| CAT # | TYPE | APPLICATION | WT. | PRICE |
|--------|-------------------------|--|-----|----------------|
| 97650 | Ganzie | Cleaning, Staining | 50# | \$65.00 |
| 97660 | Premium Ganzie* | Cleaning, Staining, Polishing, Padding | 50# | \$75.00 |
| 97950 | Colored Cotton Rags | Cleaning, Staining | 50# | \$40.95 |
| 97750 | White Sheeting | Cleaning, Staining | 50# | \$69.00 |
| 559-25 | Tight Weave Cheesecloth | Cleaning, Staining, Polishing, Padding | 25# | \$99.00 |

*White T-Shirt material with no silk screens

DENATURED ALCOHOL

Pure denatured alcohol designed for thinning shellac and Sealcoat®. **Excellent in wood prep cleaning and moisture removal in finishing and refinishing.** When applied liberally at full strength on tight grain woods, it opens up the grain to allow deeper penetration of a stain thus increased color intensity.
