

# THINNERS & SOLVENT BASED ADDITIVES

## LACQUER THINNER

Superior quality all purpose thinners designed for use with our Magna-Shield® pre-cat lacquer and our LOW VOC nitrocellulose lacquers and, most other lacquers including modified acrylics and automotive lacquers. For Water-Clear or acrylic lacquers, Lacquer Thinner #2 is recommended to avoid a bluish plume. Also excellent for neutralizing or washing of furniture and millwork surface after stripping in preparation for refinishing.

Each blend uniquely designed and balanced to accommodate weather condition(s) or changing weather conditions, type of lacquer, and finishing demand. **IMPORTANT, ALL LACQUER THINNERS ARE NOT THE SAME!** Wrong ingredients within a lacquer thinner can swell a pre-cat lacquer causing inferior flow out, orange peel, hazy film and/or bubbles. For example, too much Acetone or alcohols will cause detrimental affects upon the lacquer used or sprayed. For best results, and productivity, do not mix our lacquers with thinners and additives from other suppliers.

For most applications and weather conditions, Lacquer Thinner #1 is perfect. When it gets extremely hot and humid (in combination), Lacquer Thinner #2 is recommended. However, at 100% relative humidity or while raining, avoid spraying altogether, if possible, or if not possible, avoid using thinners altogether and substitute the Magna-Shield® Retarder, but not to exceed 10% by volume.

CAT#	DESCRIPTION	APPLICATION	SIZE	PRICE
90301	Lacquer Thinner #1	All Year Round Lacquer Reducer, Neutralizing After Stripping	Gallon	\$10.95
90305	Lacquer Thinner #1	All Year Round Lacquer Reducer, Neutralizing After Stripping	Pail	\$59.95

90501	Lacquer Thinner #2	Extremely hot & humid weather	Gallon	\$12.95
90505	Lacquer Thinner #2	Extremely hot & humid weather	Pail	\$69.95
90555	Lacquer Thinner #2	Magna-Shield®, & Water White Lacquers	Drum	Call For Pricing

## MAGNA-SHIELD® RETARDER PLUS

This unique, non-flammable retarder, originally designed for Magna-Shield® and our LOW VOC lacquers has been reformulated over the years for use with any other lacquers, including acrylics and, our Quick Drying Wood Filler in brush on application.

Requires a fraction of the amount compared to other retarders, but, more important, will not leave a finish soft as others when properly used.

MS9900	Quart	\$9.95
MS9901	Gallon	\$18.95
MS9905	Pail	\$69.95

## FLOW OUT SOLVENT

Blend of specialty solvents designed to help fast drying lacquers flow out better, eliminating orange peel, pin holes, craters and air bubbles. Can also be spray applied over semi-dry lacquer via a medium coat, to level orange peel and/or improve partially dry film's surface imperfections.

91100	Quart	\$9.95
91101	Gallon	\$18.95
91105	Pail	\$69.95

## BLUSH ELIMINATOR SOLVENT

Removes blush from sprayed lacquers. It partially redissolves the lacquer then releases entrapped moisture. Spray a medium coat over the blushed lacquer. Levels orange peel and overspray too. Doesn't leave the film soft. Quick drying.

91300	Quart	\$9.95
91301	Gallon	\$18.95
91305	Pail	\$69.95
B-871	16 oz. Aerosol Can	\$5.45

## NO BLUSH SOLVENT

Add to conventional lacquers and Magna-Shield® to eliminate blushing in hot and humid weather. Contains no retarders hence will not slow down the drying time nor leave the finish soft. Add 4 to 6 oz. per quart of thinned lacquer or sealer. Slight blushing may occur on very hot and humid days but will disappear upon drying.

92000	Quart	\$9.95
92001	Gallon	\$18.95
92005	Pail	\$69.95

## LACQUER & POLYURETHANE/VARNISH FLATTING AGENT

Excellent flattening additive for use with all our solvent based finishes (Magna-Shield and Low VOC Lacquers, and EVERLAST Finish), clear or pigmented. Allows control of finished sheen by adding prescribed amount to a finish prior to application.

Not for use with water-based or shellac finishes

### For Nitrocellulose Lacquers

91800	Quart	\$12.95
91801	Gallon	\$24.95

### For EVERLAST™, Polyurethanes & Varnishes

91900	Quart	\$12.95
91901	Gallon	\$24.95

## FISH-EYE & WET SPOTS ELIMINATORS

A must for a furniture refinisher. The fish-eye eliminator prevents and/or stops fish-eyes caused by silicone contamination, while the wet spots eliminator stops and/or prevents wet spots caused by paraffin waxes found in finish removers (used to retard evaporation) and, in many furniture polishes.
