

# GREEN TECHNOLOGY™ GYMCOAT™

This high-performance floor finish contains the most elite and innovative proprietary resins for the most demanding requirements in the coatings industry. It is highly recommended for residential, commercial and sport flooring that demand green technology, or where sensitivity to chemicals or odors is essential. Makes floor finishing and refinishing safe and easy, and furthermore the finish is easily repairable down the line. Non-yellowing and quick drying. Recommended for interior use only.

Apply by brush, roller, applicator or spray. *For interior use only. This is a self sealing finish.* However, for color enhancement to the wood grain, use a single coat of **EVERLAST™ Sealer** (page 4) under this finish.

Excellent replacement product for tung-oil finish when used in conjunction with the **EVERLAST™ Sealer**.

Available in gloss, satin and dull-satin.

### Key Features

- ✓ Green Chemistry
- ✓ Quick Drying and Non-Yellowing
- ✓ Outstanding Clarity and Depth
- ✓ Outstanding Warmth and Grain Definition
- ✓ Superb Durability for Use In High Traffic Areas
- ✓ Excellent Flow and Leveling
- ✓ No Catalyst/Pot Life Problem or Restrictions
- ✓ Recoatable any time - **100% burn-in**

## GREEN TECHNOLOGY™ WOOD STAIN

This quick drying, interior/exterior semi-transparent pigment based wiping stain is non-grain raising (on most woods) and fade resistant. It offers excellent grain penetration and color retention. Can be coated with any type of finish, solvent or water based. Apply by spray, brush or wipe-on. Dries in 15 minutes, coatable in about an hour. Excellent for use on wood flooring and furniture. Its rich colors enhance the natural beauty of the wood grain. Can be intermixed to achieve custom colors. This stain is easy to control because lapping is not a problem.

When used over dye stains, the combination produces a unique, three dimensional, beautifully enhanced grain pattern.

Its Green Technology formula makes it very suitable in a chemically sensitive environment, or wherever use of a green type product is essential.

Please specify CAT #, COLOR# and COLOR when ordering.

# EVERLAST™ GYMCOAT™

## Interior/Exterior Quick Drying

### Key Product Benefits

- ✓ Interior/Exterior
- ✓ Pleasant Odor
- ✓ Non-Flammable
- ✓ Superb Durability with Excellent Chemical Resistance
- ✓ No Limit On Number Of Coats Applied
- ✓ Easy Application by Spray Brush, Roller, Paint Pad, or Wipe-On
- ✓ High Build, Usually Requires Only 2 Coats
- ✓ Quick Drying, Reduces Time Between Coats
- ✓ Sanding Between Coats Not Required
- ✓ Blocks UV Rays From Damaging Stain Or Substrate
- ✓ No Plastic Like Appearance
- ✓ Excellent Abrasion Resistance
- ✓ Adheres To Any Finish For Added Durability or Repair, Including UV Coatings
- ✓ Superior Performance and Durability to Tung Oil

This high performance, *pleasant odor*, quick drying, and *non-flammable* floor finish fullfills the most demanding requirements in the coatings industry. **EVERLAST™ GYMCOAT™** is elastic, waterproof and able to withstand the wear and abrasion of high *foot* traffic. By far a more effective and durable replacement for tung-oil from the aspect of cure time, mar and abrasion resistance, drying time, and odor.

Provides a rock hard finish in 24 hours; tung-oil on the other hand takes thirty (30) days to cure, and doesn't even approach the hardness and mar resistance of the **EVERLAST™ GYMCOAT™**.

It is ecologically friendly in terms of low VOC and pleasant odor. Dries in about two (2) hours (at 75° F and 45% relative humidity), tack free in about 30 minutes, recoat in 6 hours. Its light straw color enhances the color of the wood grain. It absorbs UV rays into itself, thus protects the wood substrate and stain from UV damage. Resists flaking and chipping and is easy to repair at anytime. Builds fast and usually requires only two coats, plus sealer.

*The sealer offers deep sealing of the wood grain thus enhanced durability. The sealer is odorless.*

**EVERLAST™ GYMCOAT™** is also an excellent product for use on outside decking, and generally a couple of coats of the sealer will do just fine, provided low film build is desired.

Apply by brush, roller, paint pad, spray, or applicator.
